## **Now Transport Operators Can Have the Body They Always Wanted - And From a Wider National Dealer Network**

Peki rigid truck bodies have always set the standard for high quality construction and first class appearance, making them a popular choice for many operators. With the introduction of its new Fleet Solutions body range, Peki is making its rigid bodies available to a wider customer base.

Consisting of standardised Dry Freight and Freezer rigid body designs, Peki Fleet Solutions bodies have been specially engineered for a wide range of transport applications.

As part of its appeal to prospective customers, Fleet Solutions has been competitively priced so that all fleets, irrespective of size and application, can benefit from the performance and return on investment which a Peki rigid body can provide.

Peki Fleet Solutions bodies are manufactured from quality standardised components that deliver optimum performance and quicker delivery for the standard model range.

However, because Peki understands that many transport operations have specific needs, customers will have the flexibility to choose from an extensive range of optional equipment, allowing them to customise a single Peki body or one hundred bodies with slightly longer lead time.

These options include; rear door, tail lift, floor, lights, side door, refrigeration, Load Lok and shoring bars.

Fresh Bins in Warrnambool recently purchased their very first Peki Fleet Solutions body as part of their growing fleet of rigid vehicles and it provides the perfect solution for their residential and commercial bin cleaning service.

Managing Director, Paul Sewell, highlighted that the Fleet Solutions body forms an important component of the overall truck, commenting that, *"We specified Peki for its*

*performance and durability to incorporate our state-of-the-art bin cleaning system that is fully enclosed and uses high pressured water without the use of chemicals."*

Operating in Melbourne and the South West coast of Victoria, Paul has indicated that he is in the process of ordering additional Peki Fleet Solutions Bodies as part of his expansion of the Fresh Bins business nationally and internationally.

Another big Peki development this month has been the expansion of Peki distribution to a national dealer network, thus making Peki Vans and Rigid Bodies more widely available, with commensurate parts and service support.

Peki products will now be sold through the national Freighter/Maxi-CUBE dealer network, with dealers in all state capital cities and also a number of major regional centres. Contact details are available on the Peki web site.

MaxiTRANS General Manager – Refrigerated and Dry Freight Products, Kevin Manfield, believes the new Fleet Solutions body range will attract a new "performance seeking" customer base, explaining that, *"We have been extremely encouraged by the enthusiasm from local operators who are looking forward to its release. Our dedicated team of engineers has designed this new range to give all operators an opportunity to improve their overall operating efficiency and return on investment which only a Peki solution can provide."*

*"Importantly, the competitive pricing structure of the package and the enhanced Peki distribution network will give many operators the chance to utilise Peki bodies and add value to their business."*

Interested operators and fleets are encouraged to contact their local Peki dealer for further information.
